

# INDEX TO VOLUME 68, (PART A), 1990

## AUTHORS AND PAPERS

### A

- Abrardi, V., Rovero, G., Baldi, G., Sicardi, S. and Conti, R., Hydrodynamics of a gas-liquid reactor stirred with a multi-impeller system 516
- Acharya, D. R. (see Li, K.) 558
- Adewusi, V. A., A preliminary study of steam-caustic process for heavy oil recovery 350
- Agarwal, P. K. (see Wildegger-Gaissmaier, A. E.) 251
- Allen, R. M. and Bakker H. H. C., Correction of bias in particle sizing of sprays using a laser diffractometer 172
- Alonso, M. (see Satoh, M.) 149
- Alvarez, R. (see Bueno, J. L.) 391
- Amiri, M. C. and Woodburn, E. T., A method for the characterisation of colloidal gas aephron dispersions 154
- Attwood, E. T. (see Wakeman, R. J.) 161

### B

- Bahmanyar, H., Chang-Kakoti, D. K., Garro, L., Liang, T-B. and Slater, M. J., Mass transfer from single drops in rotating disc, pulsed sieve plate and packed liquid-liquid extraction columns 74
- Baird, M. H. I. (see Latto, B.) 457
- Bakker, H. H. C. (see Allen, R. M.) 172
- Baldi, G. (see Abrardi, V.) 516
- Bertrand, J. (see Poux, M.) 278
- Best, R. J., Process simulation using parallel computers 418
- Biddulph, M. W. and Kalbassi, M. A., A new column for measurement of multicomponent distillation design efficiencies 453
- Biegler, L. T. (see Logsdon, J. S.) 434
- Biscans, B. (see Poux, M.) 278
- Bourne, J. R. and Hilber, C. P., The productivity of micromixing-controlled reactions: Effect of feed distribution in stirred tanks 51
- Bourne, J. R. (see Nishiwaki, A.) 387
- Brown M. W., Lee, P. L., Sullivan, G. R. and Zhou, Weibiao, A constrained nonlinear multivariable control algorithm 464
- Brown, S. and Freeth, A., Research and development activity at the Petroleum Science and Technology Institute 384
- Bruxelmane, M. (see Ozcan, N. G.) 63
- Bueno, J. L., Dizi, J., Alvarez, R. and Coca, J., Generalized correlation for prediction of gas diffusion coefficients based on the corresponding states principle 391
- Burmester, S. S. H., Coelho, M. A. N. and Guedes de Carvalho, J. R. F., Transverse dispersion in granular beds: part IV—mass transfer around an active cylinder with the axis perpendicular to the flow direction in a packed bed 510

### C

- Carpenter, K. J., A blend of micro-gravity, crystals, viscosity, turbulence and multiple phases with biotechnology, chemical reaction and a smattering of experience: A review of Mixing 12 7
- Chan, S. W. (see Stubington, J. F.) 195
- Chang-Kakoti, D. K. (see Bahmanyar, H.) 74
- Ching, C. B. (see Hidajat, K.) 104
- Coca, J. (see Bueno, J. L.) 391
- Coelho, M. A. N. (see Burmester, S. S. H.) 510
- Conti, R. (see Abrardi, V.) 516

### D

- Dandekar, A. (see Danesh, A.) 325
- Danesh, A., Todd, A. C., Somerville, J. and Dandekar, A., Direct measurement of interfacial tension, density, volume and compositions of gas-condensate systems 325
- Dawe, R. A. (see Marsland, S. D.) 357

- Decloux, M. (see Ozcan, N. G.) 63
- Dennis, J. S. (see Fawknner, R. D.) 69
- Diwekar, U. M. (see Logsdon, J. S.) 434
- Dizi, J. (see Bueno, J. L.) 391
- Dubdub, I., Hughes, R. and Price, D., Kinetics of *in situ* combustion of Athabaskan tar sands studied in a differential flow reactor 342
- Dudley, J. W. O. (see Greaves, M.) 331
- Dunn, I. J. (see Nishiwaki, A.) 387

### F

- Fawknner, R. D., Kluth, P. P. and Dennis, J. S., Bubble formation at orifices in pulsed, flowing liquids 69
- Feyo de Azevedo, S., Romero-Ogawa, M. A. and Wardle, A. P., Modelling of tubular fixed-bed catalytic reactors: a brief review 483
- Foulser, R., Naylor P. and Seale, C., Relative permeabilities for the gravity stable displacement of waterflood residual soil by gas 307
- Free convection mass transfer in hemispherical cavities, Sedahmed G. H. and Nirdosh, I. 295
- Freeth, A. (see Brown, S.) 384

### G

- Gani, R., Perregaard, J. and Johansen, H., Simulation strategies for design and analysis of complex chemical processes 407
- Garro, L. (see Bahmanyar, H.) 74
- Garside, J. (see Tavare, N. S.) 115
- Greaves, M. and Dudley, J. W. O., *In situ* combustion processes: Reaction rate parameters from combustion tube experiments 331
- Guedes de Carvalho, J. R. F. (see Burmester, S. S. H.) 510
- Guedes de Carvalho, J. R. F. (see Pinto, A. M. F. R.) 503
- Guo, Tian-Min (see Wang, Xiao-Mei) 316

### H

- Harding, G. H. L. and Nedderman, R. M., The flight-free vibrating conveyor: Part 2. Stability analysis and criteria for optimal design 131
- Harding, G. H. L. (see Nedderman, R. M.) 123
- Hargreaves, J. H. and Silvester, R. S., Computational fluid dynamics applied to the analysis of deoiling hydrocyclone performance 365
- Hartland, S. (see Jeelani, S. A. K.) 271
- Hidajat, K. and Ching, C. B., Simulation of the performance of a continuous counter-current adsorption system by the method of orthogonal collocation with non-linear and interacting adsorption isotherms 104
- Hilber, C. P. (see Bourne, J. R.) 51
- Hughes, R. (see Dubdub, I.) 342
- Hughes, R. (see Li, K.) 558

### J

- Jamialahmadi, M. and Muller-Steinhagen, H., Effects of electrolyte concentration on bubble size and gas hold-up in bubble columns 202
- Jeelani, S. A. K., Ramaswami, S. and Hartland, S., Effect of binary coalescence on steady-state height of semi-batch foams 271
- Jegade, F. O. (see Polley, G. T.) 211
- Johansen, H. (see Gani, R.) 407
- Jomha, A. I. and Woodcock, L. V., Effects of oscillatory shear on the steady-flow of shear thickening suspensions 550

Zhou, Weibiao (see Brown, M. W.)	464

## TITLES AND KEYWORDS FOR PAPERS

### A

activated carbon	242
adsorption	537
adsorption in a single particle	242
aeration	63
agitation	63
agitator design	149
Agitator design and optimum operating conditions for a new type of powder mixer, Satoh, M., Alonso, M., Shigemura, T., Miyayami, K. and Suzuki, T.	149
alkalinity propagation	350
aphron	154
applications	13
Athabasca tar sands	342
attached bubbles	57

### B

baffles	263
batch distillation columns	434
binary coalescence	271
bioreactor	387
blade forces	57
Blend of micro-gravity, crystals, viscosity, turbulence and multiple phases with biotechnology, chemical reaction and a smattering of experience: A review of Mixing 12, A. Carpenter, K. J.	7
bubble columns	202
bubble formation	69
Bubble formation at orifices in pulsed, flowing liquids, Fawker, R. D., Kluth, P. P. and Dennis, J. S.	69
bubble size	69, 202

### C

CAD	403
cake washing	161
carbon combustion	503
catalyst	177, 530
cathodic deposition	295
CFD	13
chemical process	407
chemicals	237
coal	195
coal devolatilization	251
coal drying	251
combustion tube experiments	325
compositional analysis	325
Computational fluid dynamics applied to the analysis of deoiling hydrocyclone performance, Hargreaves, J. H. and Silvester, R. S.	365
Computational Fluid Dynamics and its application in the process industries, Sharratt, P. N.	13
computational fluid mechanics for mixing	3
computing	403
condensate	325

Constrained nonlinear multivariable control algorithm, A. Brown, M. W., Lee, P. L., Sullivan, G. R. and Zhou, Weibiao	464
constraints	464
conversion	387
conveying	131
conveyor	123
Correction of bias in particle sizing sprays using a laser diffractometer, Allen, R. M. and Bakker, H. H. C.	172
crystallization	7
crystallizer	115

### D

debottlenecking	211
density	325
deoiling hydrocyclone	365
design	523
Design of optimal solvents for liquid-liquid extraction and gas absorption processes, Macchietto, S., Odele, O. and Omatsone, O.	429
design and optimisation of sieve trays	445
differential reactor	342
diffusion	391
Direct measurement of interfacial tension, density, volume and compositions of gas-condensate systems, Danesh, A., Todd, A. C., Somerville, J. and Dandekar, A.	325
disc turbine	19, 34
dispersion	13, 161
dispersion model	387
dispersion (radial)	503, 510
dissipated power	516
dissolved solute	93, 185
distillation	453
draft-tube	13
drying	139
Drying and devolatilization of large coal particles under pyrolysis conditions, Wildegger-Gaissmaier, A. E. and Agarwal, P. K.	251
dusty-gas model	242
dynamic simulation	407

### E

Effect of binary coalescence on steady-state height of semi-batch foams, Jeelani, S. A. K., Ramaswami, S. and Hartland, S.	271
Effect of electrolyte concentration on bubble size and gas hold-up in bubble columns, Jamialahmadi, M. and Muller-Steinhagen, H.	202
Effects of oscillatory shear on the steady-flow of shear thickening suspensions, Jomha, A. I. and Woodcock, L. V.	550
effect of surfactants	271
Effect of viscosity on cavity formation and power characteristics of an agitated aerated Newtonian fluid, Ozcan, N. G., Decloux, M. and Bruzelmane, M.	63
Electrochemical approach to oil reservoir souring, An, Marsland, S. D., Dawe, R. A. and Kelsall, G. H.	357
electrochemical reaction	537
electrolyte	202, 295
electromagnetic (heating)	530
electrophoresis	278
energy	211, 237
energy balance	19
enhanced oil recovery	307, 325, 350
enhancement factor	84
environment	237
Environmentally responsible approach to energy management, An, Paul, R. C.	237
equation oriented	407
equation of state	316
estimating diffusivities	391
Evaluation of simple and complex models for mass transfer in the non-isothermal gas adsorption of multiple adsorbates in a single adsorbent particle, O'Shea, J. D. and Liapis, A. I.	242
exchanger	263
Experimental and modelling studies on the phase behaviour of nitrogen-injected hydrocarbon systems, Wang, Xiao-Mei, and Guo, Tian-Min	316

- F  
fast reactions 51  
feed distribution 51  
fermenters 287  
film flow 307  
film thickness 271  
filtration 161  
fixed beds 483  
Flight-free vibrating conveyor: Part 1. Basic theory and performance analysis, The, Nedderman, R. M. and Harding, G. H. L. 123  
Flight-free vibrating conveyor: Part 2. Stability analysis and criteria for optimal design, The, Harding, G. H. L. and Nedderman, R. M. 131  
flotation 154  
Flow generated by a disc turbine. Part I—Experimental, Ranade, V. V. and Joshi, J. B. 19  
Flow generated by a disc turbine. Part II—Mathematical modelling and comparison with experimental data, Ranade, V. V. and Joshi, J. B. 34  
flow pattern 19, 34  
flowsheeting 418  
fluidized bed 503  
fluidized bed combustion 195, 251  
foams 271  
fractals 177  
Free convection mass transfer in hemispherical cavities, Sedahmed, G. H. and Nirdosh, I. 295  
free-flow cell 278  
free surface 189  
friction 123  
froth 154
- G  
gas adsorption 429  
gas hold-up 202  
gas injection 307  
gas-liquid 287  
gas-liquid processing 57  
gas-liquid reactors 516  
gas-solid reaction model 547  
generalized chart 391  
Generalized correlation for prediction of gas diffusion coefficients based on the corresponding states principle, Bueno, J. L., Dizi, J., Alvarez, R. and Coca, J. 391  
Generation of heat in composite catalytic materials in RF fields, Ovenston, A. and Walls, J. R. 530  
glyoxylic acid 537
- H  
handling 123, 131  
heat 263  
heat integration 221  
heat transfer 483  
heat of vaporisation 185  
Heat of vaporisation and the solute-solvent interaction parameters for predicting the effect of dissolved solute on the vapour liquid equilibrium of solvent mixtures, Tan, T. C. 185  
helical 263  
hemispherical cavities 295  
highly viscous Newtonian fluids 63  
holdup 139  
hydrocarbon system 316  
hydrodynamics 516  
Hydrodynamics of a gas-liquid reactor stirred with a multi-impeller system, Abrardi, V., Rovero, G., Baldi, G., Sicardi, S. and Conti, R. 516
- I  
image reconstruction 177  
immersed cylinder 510  
Improved model of particle motion in cascading rotary dryers, An, Matchett, A. J. and Sheikh, M. S. 139  
industrial needs 3
- Industrial needs for mixing research, Smith, J. M. 3  
industry 237  
Influence of adsorption in electrochemical reaction modelling, The, Scott, K. 537  
*in situ* combustion 342  
*in situ* combustion processes 325  
interfacial tension 325  
interfacial turbulence 84  
isoelectric focusing 278
- K  
kinetics 342  
Kinetics of *in situ* combustion of Athabasca tar sands studied in a differential flow reactor, Dubdub, I., Hughes, R. and Price, D. 342  
K-model 34
- L  
laser diffractometry 172  
laser-Doppler anemometer 19  
limiting current 295  
liquefaction 523  
liquid extraction 429  
liquid hold-up 271  
liquid-liquid extraction 74  
liquid-liquid interface 84  
local molar fraction model 93
- M  
Marangoni number 84  
mass transfer 74, 161, 189, 287, 295, 503, 510  
Mass transfer at a free surface in stirred tank bioreactors, Kawase, Y. and Moo-Young, M. 189  
Mass transfer from single drops in rotating disc, pulsed sieve plate and packed liquid-liquid extraction columns, Bahmanyar, H., Chang-Kakoti, D. K., Garro, L., Liang, T.-B. and Slater, M. J. 74  
Mass transfer in gas-liquid, multiple-impeller stirred vessels: A discussion about experimental techniques for  $K_L a$  measurement and models comparison, Nocentini, M. 287  
Mass transfer and interfacial turbulence in a laminar film: Study of transferring two solutes separately and simultaneously through liquid-liquid interface, Zhang, S. H., Wang, Z. M. and Su, Y. F. 84  
mass transport 537  
mathematical modelling 34  
maximum 131  
Method for the characterisation of colloidal gas aphron dispersions, A, Amiri, M. C. and Woodburn, E. T. 154  
micromixing 51  
mixers 149  
Mixing 12 7  
mixing 3, 287, 387, 457  
mixing effects on chemical reactions 7  
Mixing of thermally stratified fluids by injecting a series of vortex rings—a numerical simulation, Latto, B., Papple, M. L. C., Shoukri, M. and Baird, M. H. I. 457  
mixing time 516  
model adaptation 407  
modelling 287, 483, 537  
Modelling of tubular fixed-bed catalytic reactors: a brief review, Feyo de Azevedo, S., Romero-Ogawa, M. A. and Wardle, A. P. 483  
model verification 13  
modified column 453  
Modified NRTL model for predicting the effect of dissolved solute on the vapour-liquid equilibrium of solvent mixtures, A, Tan, T. C. 93  
multicomponent 453  
multicomponent adsorption 242  
multiphase mixing 3, 7  
multiple mixers 516  
multivariable control 464

<b>N</b>			
N <sub>2</sub> -injected	316	propane-butane adsorption	242
New column for measurement of multicomponent distillation		protein separation	278
design efficiencies, A. Biddulph, M. W. and Kalbassi, M. A.	453	pulsed liquids	69

substrate limited microbial growth, Nishiwaki, A., Dunn, I.		scale-up of mixing	3
J. and Bourne, J. R.	387	Schlieren system	84
optimal sieve tray designs	445	selectivity	51
optimisation	221	semi-batch	115
Optimisation of process changes and utility selection in heat		separation processes	429
integrated processes, The, Linnhoff, B., Smith, R. and		shear thickening	550
Williams, J. D.	221	shear thinning	550
optimization	523	sieve trays	445
orifices	69	simulated counter-current adsorption	104
orthogonal collocation	104	simulation	278, 403
oscillatory shear	550	Simulation of the isoelectric focusing process in a recycling	
oxalic acid	537	free-flow cell, Poux, M., Biscans, B. and Bertrand, J.	278
		Simulation of the performance of a continuous counter-current	
<b>P</b>		adsorption system by the method of orthogonal collocation	
packed bed	503, 510	with non-linear and interacting adsorption isotherms,	
packed columns	74	Hidajat, K. and Ching, C. B.	104
parallel computation	418	Simulation of reactive precipitation in a semi-batch crystallizer,	
particle	123, 131	Tavare, N. S. and Garside, J.	115
particle size distribution	172	Simulations of dispersion phenomena in filter cake washing,	
particulates	139	Wakeman, R. J. and Attwood, G. J.	161
Performance improvement of tubular heat exchangers by helical		Simulation strategies for design and analysis of complex chemi-	
baffles, Lutchu, J. and Nemcansky, J.	263	cal processes, Gani, R., Perregaard, J. and Johansen, H.	407
Perspectives on computer aided process engineering, Winter, P.	403	simulation strategy	407
phase behaviour	316, 325, 350	simultaneous optimisation strategy	434
pH gradient	278	slurry	523
pinch technology	211	Slurry shale process optimization and reactor design, Jones,	
point efficiency	453	G. L. and Patzer II, J. F.	523
pore structure	177	solute-solvent interaction parameters	185
porous media	161	solvent selection	429
powder mixers	149	souring	357
power consumption	63	sparging	69
precipitation	7, 115	sprays	172
predictive model	93	stability	154
Preliminary study of steam-caustic process for heavy oil		stable cavities	63
recovery, A. Adewusi, V. A.	350	steady-state height	271
pressure drop	211	steady state simulation	407
Pressure drop considerations in the retrofit of heat exchanger		steam-caustic process	350
networks, Polley, G. T., Panjeh Shahi, M. H. and		steam drive	350
Jegade, F. O.	211	stirred tank bioreactor	189
Procedure for the design and optimisation of sieve trays, A.		stirred tank reactors	51
Ogboja, O. and Kuye, A.	445	stirred tanks	57
process changes	221	stirred vessel	19, 34
process design	403	stirrer flow-patterns	57
process simulation	418	stratification	457
Process simulation using parallel computers, Best, R. J.	418	structure	154
Productivity of micromixing-controlled reactions: Effect of feed		Structure and force transients of bubble shedding from rotating	
distribution in stirred tanks, The, Bourne, J. R. and		stirrers, Pearse, B. A. and Thomas, N. H.	57
Hilber, C. P.	51
